3.0 Course Objectives

The generation of ideas and communication of findings governs every aspect of psychological scholarship. This seminar serves as the immediate research community of each thesis student. Therefore, the seminar provides thesis students with a network of colleagues, information on thesis requirements and scheduling, and includes a number of sessions addressing the components of the thesis project. These sessions include, but are not limited to, writing, preparing and giving an oral presentation, literature searches, research ethics, subject pool orientation, etc. Thus, the course help inform students regarding the research process. Students are strongly encouraged to attend the weekly meetings held first term.

4.0 Evaluation

As part of this course, students are asked to complete an oral presentation describing their research project to the Honours Thesis class late in the fall term. These presentations (~6 per class, 10 minutes each) will tentatively start on November 3/17. **Overall, grading schemes will vary from student to student, and will be established in consultation between the student and the advisor(s). Mandatory grading components are indicated on the Thesis Contract distributed from the Honours Committee (see class or departmental website).** Final grades may be based on the final paper, the proposal, the quality of contribution and professionalism while designing and completing the project, participation and performance in weekly meetings and oral presentations (including the presentation to Thesis Class), colloquium attendance, among other factors. Note that, as in all courses, grades submitted are tentative and may be changed by the Department or Senate.
